Subject: Rosemont Mine

Categories: Blue Category

Dear Administrator:

I urge you to allow the Rosemont Mine project to proceed. As far as I know they have faithfully met all the requirements of the EPA. If they have not, please let them know immediately where issues still exist so they can remedy the issues.

If all standards have been met, then please approve their permits immediately so they can proceed and be able to open all operations.

This mine will be an asset to our community by providing employment, tax income, and by supplying the growing demand for copper.

Thank you for your time, work and for fairly dealing with all the issues presented to you.

Patricia Kryder
